Foliar-Pak®

ULTIMATE SPORTS TURF PACKAGE

From preplant to post-season, the Foliar-Pak Ultimate Sports Turf Package is a comprehensive turfgrass establishment, recovery, and maintenance program designed to take the guess work out of turf management.

1 PREPLANT:

choose one

ATS 16-28-12 w/ Armament® ZnB

Low starting fertility present in soil

Advanced Turf Solutions 16-28-12 starter fertilizer contains 30% polymer sulfur coated urea (PSCU) and is coated with Armament ZnB for improved efficiency and nutrient uptake.

RATE: 150 lbs/acre

OR

Healthy Grow® + Holganix® 2-4-3

Good starting fertility present in soil

Aerobically composted chicken manure (ACCM) infused with a biological metacatalyst that promotes beneficial microbial activity in and around the soil and plants.

RATE: 400 lbs/acre

2 SEEDING:

Foliar-Pak® Grow-In | RATE: 9 oz/1000

All-in-one complete turfgrass establishment program with the convenience of one single product. Foliar-Pak Grow-In delivers a comprehensive array of beneficial components, including a biological package specifically designed to bolster low organic soils.

3 14TH DAY:

Foliar-Pak® Grow-In | RATE: 9 oz/1000

Combines the foliar nutrients required for rapid turfgrass establishment into one jug. Foliar-Pak Grow-In expedites maturity, density, and hardiness of the turfgrass stand. Protected by Armament technology, Foliar-Pak Grow-In supplies stable, plant-available nutrients essential for root growth, cell wall development, and overall turfgrass health.

Foliar-Pak® and Armament® are registered trademarks of ENP Investments LLC. Healthy Grow® is a registered trademark of Pearl Valley Organix, Inc. Holganix® is a registered trademark of Holganix, Inc. Ultra N® is a registered trademark of Morral Companies LLC.

4 28TH DAY:

Foliar-Pak® Grow-In | RATE: 9 oz/1000

Ideal for recovery of turf damaged by biotic or abiotic stresses. Foliar-Pak Grow-In expedites maturity, density, and hardiness of the turfgrass stand. Protected by Armament technology, Foliar-Pak Grow-In supplies stable, plant-available nutrients essential for root growth, cell wall development, and overall turfgrass health.

and choose one of the following

Foliar-Pak® 30-0-0 | RATE: 8 oz/1000

Contains 60% slowly available nitrogen for a steady, even release and no growth surges. Foliar-Pak 30-0-0 liquid fertilizer utilizes complex nitrogen molecules and has a low salt index.

OR

Morral Ultra N® | RATE: 0.5 lbs/1000

Slow release urea nitrogen fertilizer that provides high efficiency and efficacy.

5 6TH WEEK REPEAT EVERY SIX WEEKS:

ATS 22-0-4 w/Armament® ZnB | RATE: 150 lbs/1000

Advanced Turf Solutions 22-0-4 granular fertilizer contains 50% polymer sulfur coated urea (PSCU) and is coated with Armament ZnB for improved efficiency and nutrient uptake.

6 8TH WEEK REPEAT EVERY ONE TO TWO WEEKS:

Holganix® PB1 LTO | RATE: 2-3 oz/1000

A synergistic blend of Holganix-infused components, including a high concentration of 8 species of beneficial bacteria, enhanced with amino acids, seaweed, vitamins, humic acid, sugar alcohols, molasses, and Armament technology to improve nutrient utilization. Promotes root development and a stronger plant immune system for better stress tolerance and faster recovery.

Foliar-Pak® Minors | RATE: 1.5 oz/1000

Micronutrient and amino acid package designed to increase photosynthetic efficiency, prolong the life of chloroplasts, and produce anti-stress compounds. Provides nutrients vital for important metabolic processes necessary for healthy plant growth.

AERIFICATION RECOMMENDATIONS:

Non-Disruptive Aeration | EQUIPMENT: Bayonet tines, 3/8" solid tines, or 1/2" solid tines

Perform every 3 - 4 weeks or more frequently for high traffic. Increases water and oxygen movement to root zone and opens channels for better root growth.

Core Aeration | EQUIPMENT: 5/8" coring tines or 3/4" coring tines

Begin core aeration 8 to 12 weeks after seeding and repeat at least 3 times per year. In situations where topdressing is being applied more heavily, use a 3/4" coring tine. Plugs should be mowed in order to preserve organic matter on the field.
