SFU SIMON FRASER UNIVERSITY

Are you a veterinarian or veterinary technologist/technician in British Columbia (BC)? We want to know more about your experiences with ticks in your clinic!

I'm reaching out to invite you to participate in the **BC Veterinarian and Vet Tech Survey on Ticks and Tick-Borne Diseases (TBDs)**. The Survey is found here: tinyurl.com/sfuvet, on the QR code, or see the ad below/attached.

As animal care providers, your knowledge of ticks and TBDs is valuable and we want to learn more about what you know, and what you need for educational resources on ticks.

About this survey

The Principle Investigator Dr. Anne-Marie (Faculty of Health Science) and Stephanie Cooper an MSc Candidate are conducting a survey to improve our understanding of BC veterinarian's and veterinary tech's baseline knowledge of ticks and tick-borne diseases, as well as their future educational needs in the context of climate change.

This confidential survey will only take approximately 20-30 minutes and we encourage all veterinarians and veterinary techs in your practice to complete it, the more the merrier!

Confidentiality

Your responses to this survey will be kept confidential and results will be aggregated for analyses. Findings will be summarized in a report and shared with veterinarians and veterinary technicians in the upcoming months.

Questions?

If you have any questions about the survey, please contact Stephanie Cooper: slcooper@sfu.ca or Dr. Anne-Marie Nicol: anicol@sfu.ca.

Thank you very much for your consideration.
