- Save 23% with the Utility PAK
- Enjoy 2017 Fall Solution select rebates on Tartan® Stressgard® and Mirage® Stressgard
- Extended agency product payment terms until May 5, 2018
- ***NEW for 2017!*** Exteris® Stressgard and Indemnify®
- All NOW Solutions purchases count toward your 2017 Fall Solutions tier rebate up to 9%*

NEW for 2017 **Exteris Stressgard** Counts toward your 2017 Fall Solutions tier rebate payment. (Not registered for sale, or use, in CA, SD and NY.)	Controls: Dollar spot, brown patch, gray leaf spot, Microdochium patch • Combination of Leaf-Cote™ and Stressgard Formulation Technology optimized for applications to fairways, greens and tees • Leaf-Cote Technology improves spray droplet adhesion, dispersion and coverage resulting in quick dry time and improved rainfastness • Quick knockdown of active disease and effective over a range of spray volumes
Tartan Stressgard Eligible for 2017 Fall Solutions 20 gal. cumulative minimum purchase through December 8, 2017 **$50/gal. Rebate****	Controls: Dollar spot, gray leaf spot, Microdochium patch, pink snow mold, red thread/pink patch, anthracnose, brown patch, fairy ring, Bipolaris and Dreschlera leaf spots, summer patch • Multiple modes-of-action manage fungicide resistant pathogens • Stressgard Formulation Technology provides product safety under summer stress, UV radiation management and improved color and density • Use in late-season programs to control Microdochium patch, pink snow mold, gray leaf spot and late season dollar spot • Manages germinating sclerotia of gray snow mold
Mirage Stressgard Eligible for 2017 Fall Solutions 20 gal. cumulative minimum purchase through December 8, 2017 Available in NOW Solutions and in the Bayer Utility PAK. **$15/gal. Rebate*****	Controls: Dollar spot, gray leaf spot, snow molds, brown patch, cool-season brown patch/yellow patch *(Rhizoctonia cerealis)*, summer patch, fairy ring, take-all patch, brown ring *(Waitea)* patch *(Waitea circinata* var. *circinata)*, red thread/pink patch, anthracnose • Offers a high level of summer safety and low plant growth regulation, proven safety in the presence of Turf PGRs • Stressgard Formulation Technology provides positive plant health effects
Interface® Stressgard Available in the Bayer Utility PAK for NOW Solutions.	Controls: Snow molds, Microdochium patch, dollar spot, brown patch, Bipolaris & Dreschlera leaf spots, Curvularia blight, red thread/pink patch, rust • Flexible, broad-spectrum disease control without risk of negative DMI turf growth effects • Multiple modes-of-action manage fungicide-resistant plant pathogens, controls DMI-resistant dollar spot • Stressgard Formulation Technology
NEW for 2017 **Indemnify** Counts toward your 2017 Fall Solutions tier rebate payment. (Not registered for sale, or use, in CA, UT and NY.)	Controls: Major plant parasitic nematodes including sting, root-knot, stunt, ring, and many others • Next-generation nematicide with a unique active ingredient (fluopyram) to deliver nematode control, resulting in improved rooting, associated nutrient and water efficiency, and overall plant health and turf quality • Kills nematodes on contact, but also has acropetal systemicity to effectively control endo- and ecto-parasitic nematodes (inside and outside of the plant) • A true nematicide easily applied in spring to deliver season-long nematode control • Fall applications reduce nematode populations, providing root health benefits to aid in root growth and turf recovery

2017 Bayer Utility PAK: Proven Control, Great Value!

23% Savings *vs. individual component products*

PROBLEM		BAYER SOLUTION	
	**Snow Mold** **Pink snow mold** (*Microdochium nivale*) occurs in cold wet weather with snow cover. Optimum conditions are periods of high humidity and temperatures ranging from 32-45°F. As snow recedes, patches 12" or less appear tan to bleached white, with perimeters appearing pink. **Gray snow mold** (*Typhula* spp) is active at 32-40°F with extended snow cover (> 80 days). Look for light yellow to gray areas 3"- 12" in diameter. Matted turf progresses quickly to a grayish-white color; a 1-inch margin halo of grayish-white mycelial growth can appear.	**Less than 80 days** (mainly pink)	Interface® Stressgard® 6 fl. oz. or Interface Stressgard 3 fl. oz. + Tartan® Stressgard 1 fl. oz.
		80 days or more (mainly gray)	Interface Stressgard 6 fl. oz. + Mirage® Stressgard 2 fl. oz. + Daconil Weatherstik® 5.5 fl.oz. or Tartan Stressgard 1 fl. oz. + Mirage Stressgard 2 fl. oz. + Interface Stressgard 3 fl. oz. + Daconil Weatherstik 5.5 fl.oz.
	**Microdochium Patch** Microdochium patch is especially problematic to annual bluegrass. Favorable conditions include wet conditions, maximum daytime temperature 45-60°F, shaded or poorly-drained locations, high soil pH and excessive nitrogen fertility. Look for small water-soaked spots, expanding and turning gray or tan with a red-brown or dark, greasy margin. Fluffy white mycelia are sometimes observed at the edge of the patches.	Interface Stressgard 4-7 fl. oz./1,000 sq. ft. as a preventive application at 14-21 day intervals or Exteris® Stressgard 4.135-12.6 fl. oz./1,000 sq. ft., at 14-28 day intervals (yearly max limit 12.6 fl. oz./1,000 sq. ft.)	
	**Dollar Spot** Dollar spot is a widespread and very destructive turfgrass disease. Fall outbreaks are common due to disease-conducive temperatures, increases in moisture (extended periods of leaf wetness) and a reduction in cool-season turfgrass vigor.	Exteris Stressgard 1.5-6 fl. oz./1,000 sq. ft., at 7-28 day intervals or Interface Stressgard 3-5 fl. oz./1,000 sq. ft., at 14-21 day intervals; fairways use 2 to 4 fl. oz./1,000 sq. ft., at 14-28 day intervals or Tartan Stressgard 1-2 fl. oz./1,000 sq. ft., at 14-28 day intervals or Mirage Stressgard 1-2 fl. oz./1,000 sq. ft., at 14-28 day intervals Use a lower rate/longer interval for preventive applications where light disease pressure is anticipated. Under high disease pressure or for early curative application, use the higher rate and shorter interval.	
	**Gray Leaf Spot** Gray leaf spot targets tall fescue or perennial ryegrass; especially seedling perennial ryegrass. Initial damage may be confused with dollar spot or *Pythium* blight. Look for uninfected Kentucky Bluegrass amidst infected tall fescue or perennial ryegrass. Maximum daytime temperature + minimum relative humidity >140 may be a good indicator of gray leaf spot activity in the late summer. At air temperatures of 82-90°F, only 9 hours of leaf wetness is required for infection. Activity can also occur at temperatures as low as 68°F. Cold weather and frost in the fall will slow or halt disease.	Tartan Stressgard 1-2 fl. oz./1,000 sq. ft., at 14-28 day intervals or Mirage Stressgard 1-2 fl. oz./1,000 sq. ft., at 14-28 day intervals or Exteris Stressgard 3-6 fl. oz./1,000 sq. ft., at 14-28 day intervals

2017 Bayer NOW Solutions is part of 2017 Bayer Fall Solutions.
*Additional program rebate includes 1% Aug/Sept purchase bonus, 1% PAK purchase bonus and tiered Total Fall Solutions EOP Program Rebate based on cumulative purchase total. Rebates paid based on participant's My Bayer Rewards profile choice as of March 1, 2018 (Distributor Credit or Loyalty Points).
**Tartan Stressgard eligible for a $50/gal. rebate, 20 gal. cumulative minimum purchase through December 8, 2017.
***Mirage Stressgard eligible for a $15/gal. rebate, 20 gal. cumulative minimum purchase through December 8, 2017.
Product & Purchase Qualifications: Must be registered in My Bayer Rewards to participate. Agency products (Exteris Stressgard, Indemnify, Specticle FLO, Mirage Stressgard, Tartan Stressgard, Bayer Leaf Spot PAK, Bayer Utility PAK and Warm-Season Herbicide PAK) purchased during program period (August 1 – September 30, 2017) qualify for end user terms due 5/5/2018. Customer NOW Solutions + Fall Solutions cumulative purchase (August 1 – December 8, 2017) must exceed $2,500 to qualify for select product rebates and Total Program Rebates. PAK component quantities count toward select product rebate minimums but do not earn the select product rebate. Product purchases contribute toward the Fall Solutions program tier rebate.
Rebates & Savings: Rebates will be paid on sales price of the unit, excluding sales tax. Reward calculations are based on tiers reflecting the customer's total eligible product purchases (including bonus opportunities). PAK discounts calculated as % savings.
Customers who qualify for the 2016 Fall Solutions 9% in-season rebate to September 30, 2017 are not eligible for both the 2017 NOW Solutions and the 2016 Fall Solutions 9% in-season programs. Overlap products will be paid the 9% 2016 Fall Solutions rebate under the terms of the 2017 NOW Solutions program. 2016 Fall Solutions 9% in-season rebate products outside of the 2017 NOW Solutions program will continue to be paid as normal.

With Bayer NOW Solutions, you save on the products you need right now.

PROBLEM		BAYER SOLUTION
	**Large Patch** Large patch is the most common disease of warm-season turfgrass. Prevention is simple with properly timed fungicides in the fall. To help, Bayer has designed programs to prevent large patch in lawns.	**Armada® 50 WDG** Broad-spectrum disease control for turf and ornamentals. *(Counts toward your 2017 Fall Solutions tier rebate payment.)* **$12/lb. Rebate**** **Specticle® FLO** Broad-spectrum preemergence control of key grassy weeds and more than 60 broadleaf weeds for warm-season turfgrass. Specticle FLO is non-staining, has a long residual with low use rates and does not require a signal word. Effective on henbit, chickweed, carolina geranium and lawn burweed. *(Counts toward your 2017 Fall Solutions tier rebate payment.)*
	***Poa Annua*** *Poa annua* germinates in late summer to early fall at soil temperatures around 70°F. A second germination flush may occur in mid- to late-winter.	
	**Winter Broadleaf Weeds** To prevent weeds that germinate over winter and in the early spring, you need to apply a preemergence this fall.
