Class 3: October 15-17	Class 3: October 22-24
Class 4: November 18-19	Class 4: November 20-21

See reverse for further detail

Training Overview

Training for Transportation Distribution Logistics employers in Maintenance Management is designed to improve company equipment performance. The training is intended to help in developing effective maintenance strategies and train employees to understand and address maintenance issues.

This training series will incorporate an assessment performed by each participant during the initial course. It will evaluate the individual maintenance department's performance against a benchmark of world class maintenance parameters.

Fundamentals of Maintenance Management is a two-level, eight-course curriculum that is aimed at developing emerging leaders (lead people, maintenance engineers, planners, supervisors & new managers) in maintenance who want to create a proactive – as versus reactive – maintenance process in their facilities that ensures reliable equipment that delivers safety, quality, delivery and cost. The training provided in 2019 is **Level 1 - Maintenance Management & Systems.** The following components are included in the training:

A. Introduction to Maintenance Excellence (3 days)
B. Fundamentals of Maintenance Leadership (2 days)
C. Introduction to Preventative & Predictive Maintenance (3 days)
D. Fundamentals of Maintenance Planning & Scheduling (2 days)

Training Logistics

The training will be offered in two cohorts, one in the northern part of the Chicago Metropolitan Region and one in the southern part of the Region. Employees will attend training on-site at four of the participating employer locations. Training will be 2 to 3 days in length for each session. The training will include both theory and hands-on components. To sign up for training use the following link: https://tdl-maintenance.eventbrite.com .

Training Funding

The cost for the training will be $3,900 per participant and a minimum of 10 participants from all companies is required to provide the training. The maximum number of participants in training is 20. Companies may be reimbursed for the cost of training if their employees are paid for their hours during the training time and successfully complete the training.
