College of Veterinarians of British Columbia

CE opportunity from the CVBC!

The CVBC and Work Safe BC are partnering to bring three CE opportunities to Registrants. There will be a one-hour webinar with an opportunity for questions. This series is a result of dialogue between the CVBC and Work Safe BC; Work Safe has recently reviewed their mandate to ensure employee safety in veterinary facilities. This means veterinarians and their staff may expect unannounced Work Safe inspections in the future.

The first webinar is **Tuesday, June 13th, 2023.** The description is as follows:

"This module provides veterinary clinic staff with a foundational understanding of WorkSafeBC including information on the Workers Compensation Act, Occupational Health and Safety (OHS) Regulations and claims management. With this foundational knowledge, participants will begin developing a deeper understanding of WorkSafe BC's function and regulatory scope and requirements for employers. Presenters will also review risk management basics and discuss what to expect from a prevention officer inspection."

Please register as soon as possible through the following link.

https://us02web.zoom.us/meeting/register/tZ0sce2vpz0jGdCDfxrujCEJgkt6STRryect

We ask that only one participant register per email address to allow us to take attendance and issue individual CE certificates, as approved by the CVBC Continuing Competence Committee.

The webinar will also be accessible to complete for CE credits on the up and coming CVBC learning platform! (Stay tuned)

Additional webinars on Bullying and Harassment and Veterinary-related Workplace Risks will be announced as the dates are finalized.

We hope you can join us to learn about what you can do to help ensure a safe workplace and get some of your CE requirements.
