What *is* Provisional Supervised Active Registration?

- It is a unique form of registration in the Private Practice class that is granted by the Registrar, on direction from the Registration Committee.
- It grants a veterinarian, who does not yet have a Certificate of Qualification from the National Examining Board of the CVMA, the privilege of practising veterinary medicine in British Columbia, under the direct supervision of a CVBC Private Practice registrant who has been approved by the Registrar to act as a PSA supervisor.

For more information about the PSA form of Private Practice registration, please visit our website (Registration/Registration Application) – the PSA content is ~halfway down the page).

***IMPORTANT NOTE**: Successful completion of the NEB's BCSE and NAVLE examinations does not automatically entitle a veterinarian to practice veterinary medicine under supervision of a CVBC-registered veterinarian – the NEB candidate must first apply for and receive PSA registration with the CVBC.*
