This is what you need coming to crochet:

You need a LIGHT color yarn, white, yellow, pink, blue, green. Solid colors. No Black, Brown or Grey or any dark color. Those colors make it hard to see your stitches. Also no variegated yarns, they too are too difficult to see your stitches. We want to make it as easy as possible to learn.

This is just a sample of colors, use only the LIGHT colors.

Use either an, I, J or K Hook (not knitting needles). Starting off with a larger hook will make it easier to start with crochet.

You are working on a sample of stitches and getting your hands used to working crochet.

Using Red Heart Yarn or Hobby Lobby I Love This Yarn is a #4 worsted weight. There is a number on the paper that tells you what range your yarn is. Of course there are other yarns out there that have the same weight but these are very easy to find.

You will need a small scissor and a Large Eye needle to use to weave your ends in so that there are no loose yarn ends.
