RMP Research Mentorship Program

UC Santa Barbara Summer Sessions

summer.ucsb.edu/rmp

SUMMER RESEARCH OPPORTUNITY FOR ADVANCED HIGH SCHOOL STUDENTS

RMP is a six-week residential and commuter summer program that engages qualified, high-achieving high school students from all over the world in interdisciplinary, hands-on, university-level research. In addition to gaining a deep relationship with their mentor and the academic benefits, the students will be immersed in university life and will network with equally ambitious and curious peers.

Students earn **8 university credits** while gaining cutting-edge university-level research experience. RMP provides interdisciplinary research projects under the guidance of UCSB researchers.

GRIT talks – will connect students to some of the best minds among the UCSB research community who present on their ground-breaking research and innovative technology. Speakers have included: Nobel Laureates Alan Heeger and Finn Kydland; and Professors Gretchen Hoffman, JoAnn Kuchera-Morin, and Michael Mahan.

DATES: June 24 – August 4, 2018

Program Eligibility

- Open to mature students in the 10th and 11th grades*
- Completed a minimum of 12 academic semester courses
- Minimum 3.8 GPA (weighted, UC a–g requirements)
