LUTHERAN FAITH COMMUNITY NURSE ASSOCIATION

From Wedding Rings to Nose Rings
Generational Differences in the Pews

By Faith Roberts, MSN, RN, NEA-BC

Sponsored by the Lutheran Faith Community Nurse Association

Have you been wondering why some churches elect to rent a high school gym or area hotel for worship? Or why the front of the worship space is an electronic haven? For some, church attendance is a given for others it is "nice if you can make it".

At the time of this presentation worship is being done with up to SIX generations attending/ watching/listening. The world we live in changes continually as has attendance patterns and financial support of places of worship.

Understanding what defines each generation helps the practicing Faith Community Nurse (FCN) to support programming and services that speak to different age groups.

Faith Roberts holds a Bachelor of Science Degree in Nursing and a Masters of Science Degree in Nursing-Health Care and Nursing Administration. She served as the Director of the Community Parish Nurse Program for Carle in Urbana IL from 1997-2021. During that time, she taught the FCN preparation course to 500 plus nurses representing over 220 congregations. Concurrently she held other positions at Carle and served as the Executive Director of Magnet, Pathway, Professional Practice and Faith Community Nursing. Faith is well known to the FCN community. Her gift of storytelling captivates her audience to both the drama and humor found in nursing practice.

OBJECTIVES
