

**Planning: LRTPs, TIPs, and Safety Plans – Feb. 22-23**  
**BIA Eastern Oklahoma Regional Office**  
**3100 W Peak Blvd**  
**Muskogee, OK**

**FHWAs Kyle Kitchel will be addressing topics such as these ~**

- **He will be diving into the regs and doing a side-by-side comparison of what the old regs said and what the new regs say and the impact of the changes.**
- **He will be talking about financially constrained TIPs and what that looks like. He will note changes in guidelines from the past.**
- **He will go into FHWA Program Reviews, and examine what FHWA will be looking for in those.**
- **He will look at timely issues such as the Dakota Access Pipeline and what that means for tribes.**
- **One of the best parts of the day will be his discussion on tribal sovereignty and how that works in the compilation of your Long Range Transportation Plan, especially in states like Oklahoma, without reservation boundaries.**

**As always, Kyle will feed off the audience and welcome discussion and questions.**
