What is Demodex Blepharitis?

Demodex blepharitis is a type of eyelid inflammation caused by microscopic parasites called Demodex mites. These mites live in the hair follicles and oil glands of the eyelids.

Symptoms

Itchy eyes

Eye lashes easy to fall off

Dry eye

Home Care for Blepharitis Prevention

Eyelid Clean

Use eyelid clean wipe once or twice a day to kill mites.

Eyelid Warm Compress

Use USB heating eye mask once or twice a day to soften blocked oil inside meibomian glands.
