National Background Investigations Bureau (NBIB) Now Expects July Design Update Launch of its Electronic Questionnaires for Investigations Processing (e-QIP) (continued)

NBIB anticipates that this revised format will improve the e-QIP experience for the applicant by allowing applicants to easily identify errors and understand how to address them before moving on.

Those familiar with e-QIP will notice visual changes to the login/registration process, and the certification process. Individuals filling out their e-QIP questionnaire immediately prior to the NBIB launch will notice the change in design the next time they log in to the e-QIP system.

***** e-QIP is web-based automated system that was designed to facilitate the processing of standard investigative forms used when conducting background investigations for Federal security, suitability, fitness and credentialing purposes. e-QIP allows the user to electronically enter, update and transmit their personal investigative data over a secure internet connection to a requesting agency.
