Hello Rick -

I'm excited to announce that Kathy Wideman will be taking over next month for Kevin as News Director here at WSAV.

Kathy has most recently served as News Operations Manager and Assistant News Director at WJBF in Augusta – where she has been in that role since February of 2012.

Prior to that she was the 5 and 5:30pm producer – from July of 2011 until her promotion in 2012.

It was her second stint at WJBF – she started her career there in April of 1995 – as a newscast producer up until April of 2000 when she took on the most important position of her life – that of a very proud stay-at-home mom.

Between her stints at WJBF – she balanced being a mom with among other jobs, being an assistant basketball coach at Augusta Prep.

And a coach is what she is at heart – and as I got to know her and spend time with her – it became apparent coaching news professionals to be their very best and to deliver high-quality content is what she is all about.

She brings the experience, talent and passion for covering local news, weather and sports to the position that I feel we need to take WSAV to a new level.

I've charged her with developing a culture of collaboration and teamwork along with one of high expectations and standards – building on the proud reputation that Kevin's leadership has brought our news department during his time here.

The bottom-line focus – relentless pursuit of excellence.

Let me know if you have questions.
