Join Contexture's Engagement Sessions

As part of Contexture's upcoming Request for Proposals (RFP) process to re-procure the technology vendor for the **CommunityCares** platform, they are inviting all CommunityCares partners and stakeholders to share feedback that will inform the next generation of Arizona's statewide closed-loop referral system.

All levels of participation are encouraged, from front-end users of CommunityCares, through executive leadership at participating organizations. This will be an opportunity for providers to give direct feedback on the system.
