ISPE Students' Chapter has successfully concluded the AGM, marking the end of the 2021 committee's journey. It has indeed been a remarkable experience with various new events and initiatives being rolled out to meet the members' needs.

In terms of events, there was a focus on soft skills and showing the dynamic nature of the pharmaceutical industry. For instance, "Connect with Resume" was initiated to equip our members with skills to craft an impactful resume for job search. "Food Future" was initiated to show the interlinks between the food and pharmaceutical industry. It reflects the huge opportunity that the pharmaceutical industry offers.

In terms of initiatives, there were many aimed to increase members' engagement and bring more value to them. For instance, the monthly info-blast served to simplify scientific information to digestible parts to increase our members' knowledge. There were also monthly bonding sessions to provide networking opportunities and for members to know one another better.

Personally, it has been an eye-opening experience as I worked with a team of dedicated and passionate individuals. Each member of the leadership team I worked closely with has innovative ideas and practices and successfully executed them. It was honour to have worked with the team and to see us grow together and see the students' membership numbers grow by more than 25%.

I am pleased to announce that the incoming President is Gary from SIT. He is studying Pharmaceutical Engineering. I believe he has the perspective and skill set to lead the next team to greater heights.

Gary has a few words to add: Hello, I'm Gary and I'm honoured to be given this opportunity to be part of ISPESC as the President! I am greatly inspired by the achievements and initiatives done by the ISPESC Leadership team in 2021, and I have high hopes for the Incoming Leadership team to achieve greater heights in 2022!

Looking forward to what the next team will do, and I believe ISPESC will grow into a greater chapter!

Regards,
Chan Jin Wei Louis (Mr.)
President of ISPE Singapore Affiliate's Student Chapter
