Vacancy Announcement
Tenure Track Faculty Cluster Hire

The College of Fisheries and Ocean Sciences (CFOS) at the University of Alaska Fairbanks (UAF) seeks applications from exceptional candidates for at least two tenure-track faculty positions to complement CFOS’ breadth of expertise in fisheries and ocean sciences. We invite applicants with sea-going programs in chemical, geological, physical, biological, or fisheries oceanography, whose research plans include use of the ice-capable, Global Class R/V *Sikuliaq*, and who will further the mission and strengths of the College. These faculty appointments are intended to be at the rank of Assistant Professor, although outstanding candidates at a higher rank will be considered. These positions begin a broader campaign to hire up to five faculty to enhance research, teaching, and service in the College of Fisheries and Ocean Sciences.

UAF is Alaska’s research university, North America’s Arctic university and a world leader in both Arctic and climate-change research. The successful applicants will enjoy opportunities for collaboration within CFOS’s world-class, high-latitude research programs. The College offers a B.S. in Fisheries and Ocean Sciences, a B.A. in Fisheries, Minors in Marine Science and Fisheries, a new Master of Marine Studies degree program, as well as M.S. and Ph.D. degrees in Oceanography, Marine Biology and Fisheries. The UAF campus houses the Ocean Acidification Research Center, the Alaska Stable Isotope Facility, a new Multi-Collector ICPMS, and the Advanced Instrumentation Laboratory (AIL), the Core Facility for Nucleic Acid Analysis. Our coastal facilities include the Seward Marine Center, the NOAA-UAF Kasitsna Bay Laboratory, the Alaska SeaLife Center, the Kodiak Seafood and Marine Science Center, and the Lena Point Fisheries Facility. The College has over 150 faculty, researchers and staff based throughout Alaska, more than 100 graduate students engaged in thesis research in Alaska waters and throughout the world, and a growing undergraduate degree program in fisheries and ocean sciences.

Applicants must hold a Ph.D. in oceanography or closely related discipline, and preferably have post-doctoral and teaching experience. The position requires research, education and service that support Alaska’s ocean resources and the communities that rely upon them. The successful candidate will be expected to teach core courses and/or develop specialty oceanography courses for the graduate and undergraduate academic programs, develop a vigorous externally funded sea-going research program, and mentor graduate students. Interested applicants should submit a statement of interest that outlines their qualifications for this position and includes a research plan, teaching interests, curriculum vitae, and the names and contact information of at least three references. Applications must be submitted to Job #508328 at [http://alaska.edu/jobs/](http://alaska.edu/jobs/). For questions about these positions, please contact Dr. Mark Johnson, Chair of the Search Committee, at majohnson@alaska.edu. For full consideration, applications should be received no later than February 28, 2018 by 11:55 PM Alaska Standard Time.
