GROW APPALACHIA

BEREA COLLEGE

Grow's Fall garden here at the settlement is growing well. Volunteers helped plant gourds, pumpkins, beans, sweet corn and ornamental corn.

Tim Lambdin, project coordinator, is busy making home garden visits. He will see how the gardens are doing, answer questions and take a few pictures. We will soon start seeing some harvest information starting to come in.

This has been a great experience for the community and for Henderson Settlement. Thanks again Grow Appalachia for your moral and financial support!
