Youth Development Learning Lab – The Greenhouse

We are featuring Lona Cobb as one of our youth who has been volunteering at the greenhouses for more then 4 years.

Lona at Temple Bar, Dublin, Ireland

She has just completed her freshman year at Berea College. They guarantee each of their students a full tuition scholarship to cover most of their costs for college. Most of their students graduate with little to no student debt. **Lona was able to study abroad** for three weeks in Ireland through Berea College

Coming back home for her summer break, Lona has worked as a Community Ambassador through the Labor Program at Berea College, here at the greenhouses. With Casey acting as her on site supervisor she was able to earn a wage for her hours worked.

Lona has learned much from this experience, such as business management, customer service, and gardening to name a few. She hopes to continue working at the greenhouses as she completes her studies at Berea College. (Look for their interview on HS FaceBook Live or our YouTube channel https://youtu.be/OKdVdCsh5bM

Lona picking beans with her friend, Johannes Butz, from Germany.
