**-What options procedures and treatments are available with life threatening illness? No one talks about this until it is too late.**

**-You have a say how you want to be treated during a life threatening situation.**

**-Your life decisions are in your hands. What about when it is ending? Who will make the decisions for you? When you can't make decisions, don't leave your family with a traumatic mess to deal with.**

\*Dr. Jeremy Grosser, Medical Director, Northridge Hospital has a mission to share his medical knowledge, and experience with Critical Care, Emergency Care, and life threatening experiences. This **free** presentation is suited for elders, and/or their families. Dr. Grosser talks about the need for an Advance Care Directive, or Care Advocate, or Power of Attorney needed before entering a hospital for critical care and life threatening procedures. He will thoroughly explain how this difficult time can be made easier for all involved including the patient and medical team. He is a wonderful speaker who gives insights to the mysteries and "What is going on" in the ICU's, and during critical care situations.
