Why Won't My Grass Grow?

A few quick checks can make all the difference!

A SIMPLE GUIDE TO A HEALTHIER, GREENER LAWN

1 IS YOUR LAWN GETTING ENOUGH SUN?

Have you trimmed your trees or raised the tree canopy?

- **YES** — Continue to Step 2.
- **NO** — Raise the tree canopy and thin lower branches to allow more sunlight to reach the lawn.

Lawn Tip

Most turf grasses need several hours of direct sunlight each day to thrive.

2 ARE YOU USING THE RIGHT GRASS?

What type of grass have you planted?

- **YES** — **SHADE-TOLERANT GRASS** — Continue to Step 3.
- **NO** — **NON-SHADE-TOLERANT GRASS** — Consider replacing it with a shade-tolerant variety such as Zoysia.

Lawn Tip

Sod typically establishes faster and more successfully than seed in shaded areas.

3 IS YOUR IRRIGATION WORKING PROPERLY?

- **YES** — Continue to Step 4.
- **NO**
  - Test the irrigation system.
  - Verify full lawn coverage.

Lawn Tip

Dry spots often indicate broken, clogged, or misaligned sprinkler heads.

4 HAVE YOU TESTED YOUR SOIL?

- **YES** — Continue to Step 5.
- **NO** — Test the soil to determine nutrient levels and pH.

5 HAVE YOU TALKED TO A LANDSCAPER?

- **YES** — Document the landscaper's recommendations.
- **NO** — Contact a qualified landscaper to evaluate the bare areas and recommend a solution.

BEFORE YOU MAKE LANDSCAPING CHANGES

- Review the Stonebridge Ranch Modification Design Guidelines and share them with your landscaping professional.
- Confirm the proposed improvements comply with community standards.
- Submit a Modification Application if required.
