Whitchurch Engineering Celebrates 30 Years of Engineering Excellence

Whitchurch Engineering proudly celebrates 30 years in business this month, marking three decades of delivering high-quality engineering solutions, trusted partnerships, and sustained growth.

Founded in 1996, Whitchurch Engineering began with a clear mission: to provide practical, high-quality, engineering services grounded in integrity, technical expertise, and responsive client service. What started as a small, dedicated team has grown into a respected engineering firm helping clients solve complex challenges across multiple industries.

Over the past 30 years, the company has expanded its capabilities and strengthened its team of skilled professionals. Through changing markets and advancing industry standards, Whitchurch Engineering has remained committed to thoughtful engineering solutions which meet real-world demands.

The firm's work can be seen in landmark projects such as the North Coast Co-op, Sequoia Park Zoo, Bay Front One, the Eureka VA Clinic, Eureka Fisherman's' Terminal, Fortuna Volunteer Fire Department, The Courtyards at Arcata, Fortuna Family Apartments, Bear River Pump & Play, Bear River Event Center, Southern Trinity Health Services, Elk Valley Casino, Yurok Wellness Center, and the Humboldt Bay Power Plant. These projects represent a cross-section of local and neighboring counties residential, commercial, industrial, healthcare, and tribal communities infrastructure.

The company credits its longevity to a strong culture of collaboration, technical excellence, and a forward-thinking approach to engineering challenges.

As it enters its fourth decade, Whitchurch Engineering remains committed to delivering practical engineering solutions and serving communities for generations to come.
