Reducing Food Waste
Bill Gianni, RI Resource Recovery

Please register **HERE**. Registration link is also on the website calendar. You will receive the Zoom link immediately by email.

You will learn how food waste occurs, the impact of wasted food, and simple tools that have been shown to be effective in reducing household food waste. From an environmental impact standpoint, preventing household food waste has the double benefit of decreasing the amount of food waste going to the landfill (where it produces methane, a potent greenhouse gas) as well as saving households' money by preventing edible food from going to waste!
