Pro Board 2027 Accreditation and Education Conference

"Facing the Challenges"

Dallas/Plano Marriott at Legacy Town Center
Plano, Texas
January 14-16, 2027

WORKSHOP TOPICS

My Site Visit is Approaching. How do I plan for success? (SV)
Your online application, self-assessment, and assessment methodology matrices are designed to tell your agency's story and provide a foundation for the Committee on Accreditation's review. It will also be utilized as a major part of your site visit. This session will help you navigate through these documents.

Artificial Intelligence in the Certification Environment- (AI)
Artificial Intelligence (AI) can be a useful resource in the accreditation and certification arena. This session will explore what it looks like today and what challenges it has created.

Test Item Analysis- (TIA)
This session will address how to interpret the data that may be generated by cognitive test item software. Does the test item remain in the bank, should it be altered, or deleted? It will also review performance-based test items to assure validity and reliability.

Inter-Rater Reliability- Why, Where, and How. (IRR)
Inter-Rater Reliability is an important aspect of any successful certification program. This session explores the areas where consistent approaches to evaluators, scripts, instructions, etc. are crucial.
