We gather here to remember, to honor, and to grieve. These six named were all members of their community, human beings with families, dreams, dignity, and constitutional rights. We gather here on hallowed ground, ground here hallowed by their memory and by your presence.

The shootings of these humans are not random incidents, not isolated incidents. They are the consequence of an uncaring federal policy. Indeed, they are the consequence of a federal agency unschooled in American values, indifferent to constitutional protections, uninterested in the consequences of its own ignorance, and unfearful of the consequences for its own violence.

So as we gather in grief, we gather also in solidarity. We pledge to be a community that protects its neighbors, our neighbors. We demand constitutional rights for ourselves, and for our neighbors. And we assert our dignity, and the dignity of our neighbors.

And we demand ICE act like a regular American police force, a constitutional police force. So no masks—in this nation, criminals wear masks, not law enforcement. And only judicial warrants. This nation was founded on such principles. Enforce only judicial warrants, just like every other American law enforcement agency.

And body cameras; for a while now, body cameras for ICE have been fully funded. If an ICE officer carries a gun, goes into the field carrying deadly force, we say this officer must wear a body camera too. As is commonplace among law enforcement agencies in this country, this nation is founded on a constitution, not on the whims of some monarch or gangster boss. ICE—learn about constitutional law enforcement principles, American law enforcement principles. Act like Americans, like the law enforcement agents of a democracy, not like the thuggish muscle in some gangster gang or antique and desperate autocrat.

No masks. Yes, Body cameras. Yes, Judicial warrants.

And after all these deaths, we call independent investigations, transparent investigations, in order to hold accountable those responsible for bringing the violence.

Our congressional representative on the Coast is Sam Liccardo: No masks, yes body cameras, yes judicial warrants, yes transparent investigations. Tell him.

For we have come here to grieve, to remember, to honor, and to *proclaim*. We raise our voices, and demand that tomorrow not be the same as today, we proclaim that we aspire to the best of our American values, we proclaim that in our dignity as citizens, our dignity requires that we support the dignity of those around us, our neighbors, that it is in this shared dignity that comes the greatness of our unfolding American journey. So be loud, be hopeful, and be kind.

I close in gratitude for your presence, for the Presence, for the Spirit of Life, to our shared American values, and I bless you all.
