
Course Title: Masterclass on Soft Tissue Management and Socket Seal technique

Course Date: One Full Day Master Class Course

Speakers: Dr Domniki Chatzopoulou/ geistlich product specialists

CPD: 5hours/ 20-25 Candidates

Aims:

The aim of this course is to discuss simple surgical soft tissue management, including indications and principles for deepening of vestibule and extraction of a tooth followed by socket preservation with the use of latest biomaterials on models and pig jaws.

A hands-on session will provide an opportunity to carry out surgery on pig jaw.

Objectives:

By end of the day you should be aware of:

- Indications of deepening of vestibule and increase of keratinised tissue
- To describe surgical flaps, deepening of vestibule and use of biomaterial for free gingival grafting
- Flap closure, suture techniques and surgical handling of tissues around teeth
- Non traumatic extraction of a tooth and socket preservation with the use of biomaterials, seal socket preservation
- Rationale of guided bone regeneration/application of biomaterials
