

Kg's BOOT GUARD

5 EASY STEPS

2 COLORS
2 SIZES

APPLICATOR AND
 SANDING DISK
 INCLUDED

SUPERIOR BOOT PROTECTION

Get more mileage out of your workboots. Kg's Boot Guard offers superior protection from toe wear, water seepage along the welt, and seam erosion. The boot guard can be applied to new or used boots and bonds to leather, rubber, Cordura, vinyl, and even to exposed steel.

Kg's Boot Guard is tough and permanent! It will not crack, peel, or flake off. Simply brush on the first coat, let dry for two hours, brush on one last coat, and dry overnight. The applicator can be cleaned with mineral spirits for reuse.

OPTIONS

ITEM#	SIZE	COLOR	PRICE
22720	2oz	Black	\$5.50 each
22721	2oz	Brown	\$5.50 each
22722	4oz	Black	\$7.75 each
22723	4oz	Brown	\$7.75 each

DETAILS

Each 2oz jar typically contains enough coverage for at least three boot applications.

DRYING TIMES

Kg's Boot Guard is a polyurethane mix that requires high humidity and a temperature of 55 degrees Fahrenheit or above for normal drying times. In certain climates especially during the winter months when temperature and humidity levels drop drying times may significantly increase. To speed up drying times LIGHTLY mist the freshly applied Kg's Boot Guard with water and place in front of a fan. Repeat every hour until completely dried.

Doing business, made easy!
