

Join our upcoming Webinar in May and learn more about BrainVision Analyzer 2 - SAVE THE DATE: Registration opens on May 14th, 2018 -

Dear Analyzer 2 user,

on May 14th, registration for our upcoming webinar will open.

BrainVision Analyzer 2 Webinar (2/2018): Analysis of Event-Related Potentials

Target group:

This webinar is designed for **researchers who have already a little experience with BrainVision Analyzer 2** and want to learn how to perform ERP analyses.

Topics:

- ▶ Theoretical background of ERPs
- ▶ Common preprocessing steps
- ▶ Conditional segmentation with Advanced Boolean Expressions
- ▶ Create ERPs by averaging
- ▶ Detection of ERP peaks
- ▶ Export of outcome measures

We recommend familiarizing yourself with the basic concepts of EEG.

How to attend?

Attendance to this webinar is **free of charge**, so make sure one of the available spots is yours.

Registration on our [website](#) will open on Monday, May 14th, 2018, 15:00 (CEST)

For your convenience we are offering 2 different time slots for this webinar. The content of each time slot is the same, **please sign up for ONE time slot only**. In case you sign up multiple times, we can only accept your first registration.

- ▶ Time slot 1: Wednesday, May 23rd, 2018, from 09:30 to 11:00 (CEST)
- ▶ Time slot 2: Thursday, May 24th, 2018, from 17:00 to 18:30 (CEST)

Please make sure to check your time difference to CEST before signing up for one of the time slots.

Additional Information

You will receive all details for joining the respective webinar once your registration has been processed.
