A CME and CE Workshop for Physicians and Licensed Health Care Professionals On:

Survivor-Centered Support — Improving Your Response to Intimate Partner Violence (Part 1)

Presentation Overview

This training will explore the dynamics and health impacts of intimate partner violence (IPV) and demonstrate universal prevention education using the Confidentiality, Universal Education + Empowerment, and Support (CUES) framework. It covers trauma-informed responses to disclosures, culturally and linguistically tailored interventions, and actionable steps for integrating team-based care into clinical workflows.

At the end of the program, attendees should be able to:

- Describe the dynamics and health impacts of IPV and identify at least three associated health outcomes.
- Demonstrate how to provide universal prevention education to all clients using the CUES framework through roleplay or case scenarios.
- Apply at least two strategies to implement a trauma-informed, coordinated response when patients disclose IPV.
- Develop approaches to offer linguistically and culturally concordant interventions and outreach, and list two examples for diverse populations.
- Outline next steps for team-based care implementation, including at least three actionable items for integration into clinical workflows.

1.5 CME and CE Credits Offered

The certificate will be issued via CloudCME once the evaluation is completed.
