Contract Transport Services, LLC -- headquartered in Green Bay, Wisconsin -- has been a Wisconsin Clean Cities member since 2013.

When CTS began in 1985 as a single-truck operation doing cartage work for paper mills in the Green Bay area, it was impossible to know what a leader the company would become in Midwest regional transportation services. But here they are 30+ years later with a fleet of over 150 trucks, providing exceptional, predictable transportation and logistics solutions in Wisconsin, Minnesota, Illinois, Iowa and Michigan.

CTS's vision -- to recognize people who do the right thing so they know their impact on the success of the company – is what sets the company apart and makes them stand out as a leader in the trucking industry. Its employees are continually acknowledged for doing their jobs well. CTS takes a no-frills approach to finding solutions and overcoming obstacles, and exceptional service is the number one priority. The company strives for mutual respect between management and driving professionals, and their employees pass that same level of professionalism on to the customer.

CTS is dedicated to being an employer of choice for CDL truck drivers in the Appleton, Green Bay, Milwaukee, Wausau and Upper Michigan areas. The company's truck driving professionals are held to high standards, and that means customers can count on extraordinary service each and every time. CTS set out to continually exceed expectations, and that's what they do.

CTS guarantees its customers that their products will be delivered safely, economically and always on time. When you choose CTS for your transportation needs, you're committing to a company that places a high importance on the environment. CTS has partnered with the U.S. Environmental Protection Agency as a SmartWay affiliate to help reduce greenhouse gas emissions, curb air pollution and improve fuel efficiency for sustainability. CTS is proud that 98 percent of its entire fleet runs on compressed natural gas (CNG), which reduces customer costs and has positive impacts on the environment. On March 11, 2020, CTS's new CNG station went live with a four-lane fast fill station and 48 slow-fill slots with room for expansion. The private station serves approximately 70 CTS trucks and eliminates the need for drivers to have to make additional stops for fuel. Now, drivers can simply end their days and connect to the slow fill line, allowing the truck to refuel while they are at home.

In 2019, CTS was given the Forward Fleet Award by Wisconsin Clean Cities, as well as honored by Heavy Duty Trucking (HDT) as a Top Green Fleet of 2019. Wisconsin Clean Cities is proud to have, CTS Vice President of Finance Carrie Kratz as a member of the Wisconsin Clean Cities Board of Directors.
