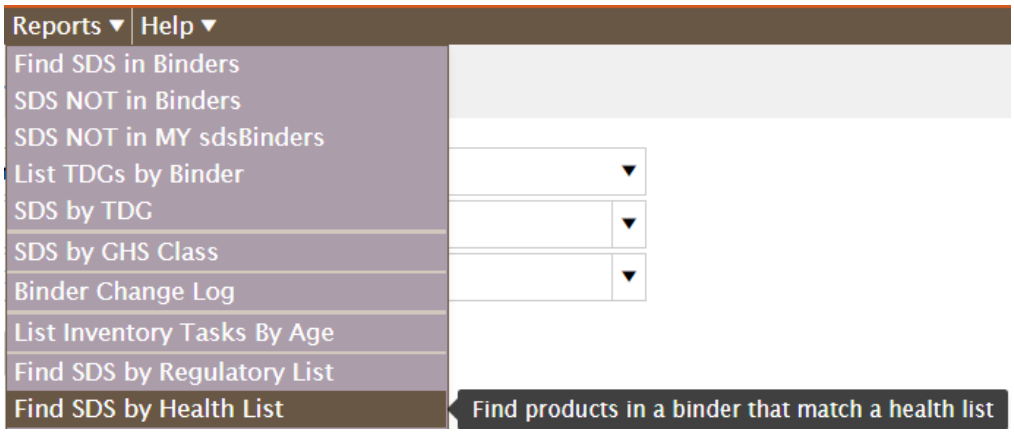
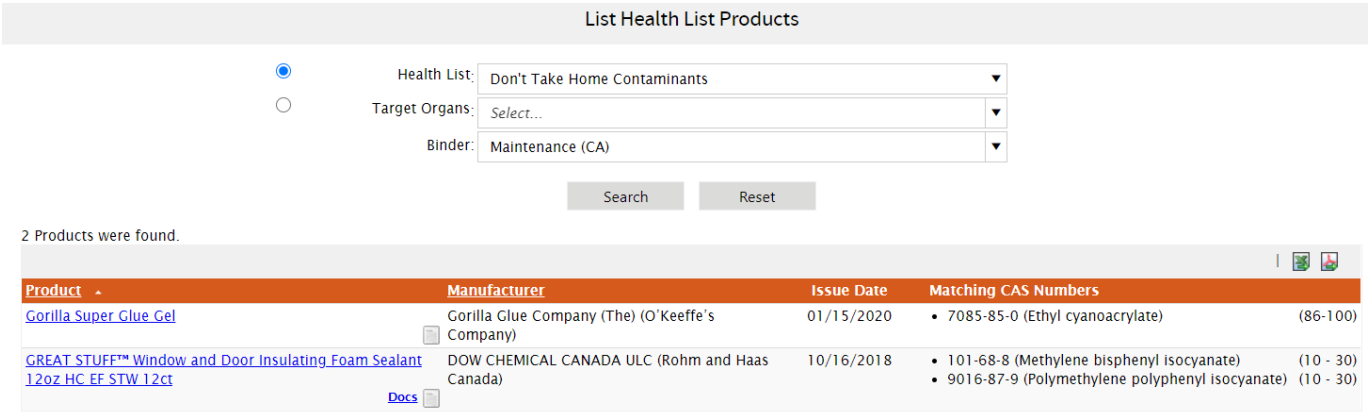
How to search for products on a Health List

1. To search for products in your inventory against a Health List go to the main menu, select **Reports** and select **Find SDS by Health List**.



2. These reports are usually done with the Corporate binder to search through all your chemicals. You can search by **Target Organ** or by **Health List**. Click **Search**. The system will list the product of concern including the ingredient with matching CAS Number. You can download the results by Excel or PDF.



3. You can download this health list to a PDF file by clicking **Download**.
