

### This Month's EcoFeature Product:

**Swissol-Inc. Press+Wash Dispenser – a patented tamper proof, drip free dispenser system for your eco-hotel!**

Let's face it – no eco-hotelier is going to get excited about using a green product that makes life harder for housekeeping or has a negative impact on the guest experience, no matter how environmentally-friendly that product may be. For those reasons, many hotels have been reluctant to switch to a dispenser system for their amenities. First generation dispensers leak all over the place. They wear out quickly. They are unsanitary. And refilling them is just a pain in the neck.

That's why we at EcoGreenHotel were so excited to learn about the **[Swissol-Inc. Creative Body Care Press+Wash](#)** dispenser system – the only patented tamper proof, drip free closed dispenser system on the market today. Press+Wash is the perfect solution for sustainable hospitality because:

- **It's clean.** The patented closed tamper proof system means that neither guests nor housekeeping staff can come into direct contact with the liquid inside the dispenser. It's totally sanitary. No other system on the market can make that claim.

- **It's durable.** Press+Wash has no mechanical pump to wear out or harbor germs. The entire technology is in the bottle, which is easily and cleanly replaced when empty.
- **It reduces impact on the waste stream.** The Press+Wash dispenser itself is made entirely from PET recycled product. The liquid product containers are recyclable too, and they squeeze out every last drop of product. The system eliminates the need for the miniature toiletries that clog our landfills and waste liquid product.
- **Housekeeping will love it.** There are no messy drips to clean up, and no bottles to refill. Just unlock the cap and pop the bottle into the dispenser. It couldn't be quicker or easier than that.
- **It dispenses high quality amenities.** The biodegradable, dermatologically-tested hair and body care products are made in Germany and FDA-approved. Ingredients are listed on every cosmetic product.
- **It's economical.** Press+Wash customers report that at 60% occupancy, a Press+Wash bottle lasts around a month. They also report annual savings of 30 – 50% compared to miniature soaps and bottles. And the dispenser unit has anti-theft features to keep it from “walking out” of your facility.

EcoGreenHotel salutes **Swisssol-Inc. Creative Body Care** for coming up with such an innovative product as **Press+Wash**. It's a win-win-win situation for eco-hotels, guests *and* Mother Nature!
