## Empire State Chapter

The Empire State Chapter of AUVSI is supporting the second Unmanned Aircraft System Traffic Management Convention, which will provide a collaborative environment, where partners can help shape the future of the UAS traffic management. A comprehensive research effort, led by NASA, UTM aims to safely integrate low-altitude unmanned aircraft into the national airspace.

The 2016 UTM Convention will be held Nov. 8–10 in sites across Syracuse, New York, and at the Griffiss International Airport in Rome, New York. The convention is expected to attract attendees from the systems integration, unmanned aerial vehicle and unmanned traffic management industries from across the globe.

In addition to the UTM Convention, the Empire State Chapter hosts events to promote the investments and innovation made by our members in this burgeoning industry. The chapter is focused on shaping regional policy by advocating on behalf of the unmanned systems community to ensure the growth of this emerging technology and marketplace.
