STAFF SPOTLIGHT

RACHEL CRUTCHFIELD

What is your position with Open Door?
Database Chair

How long have you been with Open Door?
About 7 years

Give three words that describe Open Door:?
Empowerment, Community, Education

Reflect on a moment or event with Open Door that is memorable to you:
At the end of my Masters program in Data Science I had the opportunity to make use of my new education in a practical way - I created a new relational database for Open Door as a project for a class. Since then I've been able to create new iterations of it to better fit Open Door's needs. I really appreciated the chance to allow my passions to intersect in that way.

Why would you recommend someone to be on Open Door staff?:
Being a part of Open Door gives you the opportunity to make a real difference in the community and in individual students' lives regardless of whether your skills lie in teaching, administration, finance, data science, or something else completely.
