Support the Hood River County K-5 STEM Van - Help Us Keep STEM Education Rolling!

Dear Gorge Technology Alliance Member,

The Hood River County School District is reaching out to you to seek your support for our K-5 STEM education initiative.

Mobile classroom support has been a cornerstone of our K-5 STEM education efforts, bringing interactive and engaging activities directly to schools and community events. It has inspired countless young minds, fostering a passion for learning in the fields of science, technology, engineering, and mathematics (STEM). Every year, our K-5 STEM Program directly reaches over 1,500 Hood River County students in their classrooms.

To ensure the continued success of this vital program, we have secured funding to purchase and outfit a new van that will serve as K-5 STEM mobile classroom support. Our former, iconic, STEM bus, which has served as a mobile classroom for our district, is no longer functional after years of dedicated service.

We are in the last phase of the rollout process for the new K-5 STEM Van but need $2500 to complete the project. These funds will be utilized to wrap the van in an engaging and eye-catching design to promote the district's program and announce the K-5 STEM program's arrival at local elementary schools.

Your generous contribution can make a significant impact on the future of STEM education in Hood River County. We have outlined three distinct sponsorship levels to provide you with options that align with your desired level of support; all contributions will be recognized by the HRCSD School Board at a board meeting:

$500 to $999:

Your organization's small logo will be displayed on a section of the van.

$1000 and above:

Your organization's large logo will be prominently displayed on a section of the van.

Your support at any of these levels will contribute to the completion of the STEM Van project, ensuring that STEM education remains accessible to our students.

Please note that donations to Hood River County School District are tax-deductible for federal and state income tax purposes within the limits specified in the Internal Revenue Code and state law.

To contribute, please contact our Director of Curriculum and Instruction, Amy McConnell at: amy.mcconnell@hoodriver.k12.or.us. Your support, no matter the amount, will make a significant difference in the lives and education of our students.

Thank you for considering our request. Together, we can keep STEM education rolling and create a brighter future for the youth in Hood River County.

Sincerely,

Bill Newton, Superintendent
