

Dr. Chris Major Available Course:

Sunday, October 22nd – 8:00 – 12:00 p.m.: 2017 Radiology Review

This course will review the subtypes of spondylolisthesis, with emphasis on degenerative joint disease and pars fracture. Return to play decisions in young athletes will be discussed. The most clinically relevant congenital anomalies will also be reviewed. Quiz cases will be interspersed between topics to create variety in the pace of the presentation and help break up longer discussions.

Dr. Chris Major

Doctor of Chiropractic

Chris Major, DC, DACBR, ATC, is an assistant professor in the department of diagnostic imaging at Northwestern Health Sciences University. He teaches courses on spinal anatomy, congenital anomalies, trauma, and arthritis. He is also the Director of Radiological Consultation Services at Northwestern, which provides interpretation services to private practice doctors, as well as the Center for Diagnostic Imaging. Dr. Major completed a three-year radiology residency at Northwestern. Prior to attending chiropractic school, Dr. Major graduated from the University of Wisconsin-Eau Claire with a degree in Athletic Training, where he had the opportunity to work with a wide variety of athletes, including an internship with the NFL's Kansas City Chiefs. He is a chiropractor with a passion for radiology and teaching.
