IHCP Program Membership:

Total Membership decreased in January. With **1,631,059** members, there were **35,278**, or **2.12%, less** members in January 2026 than in December 2025. Total Membership has fallen by nearly **340,000** since March 2025.

Category Membership:

Four of the five major categories declined in January. HIP membership saw the steepest decline, falling by the largest percentage and absolute number, accounting for 54% of the total drop.

Insights:

The chart tracks IHCP enrollment and unemployment from 2021-2025. Since IHCP membership is largely determined by household income for most members, we hope to see a strong positive correlation. However, there is a slightly negative correlation, -0.46, meaning when one goes up, the other tends to go down, but not directly. The Public Health Emergency coverage mandates and the 2025 drop in membership show that administrative policy rather than economic need is the primary driver of membership trends.
