DISASTER PREPAREDNESS

What to do Should the Super El Niño Negatively Impact My Location

God only knows what weather is in store for us in the days to come. Those who forecast such things have so far been pretty accurate what with the tropical events which impacted Hawai'i earlier this Fall. The super El Niño which is in play has the potential to bring significant rain/snow events to the District. What can you do to prepare? Like the wise virgins who were part of the lectionary reading on November 8, now is the time to take any actions which might be of help should the storms of December and January, or days to follow, bring about extraordinary challenges to daily life.

Here are some basic suggestions of things you can do and resources you can access to have items to help carry you at least through the first 72 hours should an event impact your location. If you or someone you know needs additional help, please feel free to call our District Disaster Response Coordinator (DDRC), the Rev (em) Philip W Zabell, 530-520-1458.

It's helpful if the Bible is physically not too large.
