

Cool Silicon e.V.

In 2009, the cluster Cool Silicon e. V. was founded aiming to increase energy efficiency within the field of information and communications technology (ICT). Today, 60 companies and research institutes from the leading microelectronics region Silicon Saxony are organized within Cool Silicon e. V.

The core competency of the business location Saxony is Micro- and Nano electronic technology as well as the sectors in which Micro- and Nano electronic technology is crucial. A key sector herein is modern ICT. Within the scope of the Cool Silicon cluster, these substantial competencies are being used to develop energy efficient solutions in the areas of computing, mobile communication and sensor technology - up to the point of energy autarkic systems.

Advantages:

- Intense exchange of ideas and know-how between partners working in different fields, as well as the knowledge transfer from academia to industry
- German „Leading-Edge Cluster“
- Highest concentration of ALD facilities in Germany
- Combination of hard- and software capabilities
- Excellent knowledge on German and European Funding opportunities for R&D cooperation

The Cluster Manager, Mr Frank Bösenberg, will be representing Cool Silicon in the Cool Silicon Cluster business delegation that will visit Toronto and Ottawa from October 23-27, 2017.

If you are interested in discussing potential business opportunities with Cool Silicon please contact:
