Data Collection & Reviewing Key Indicators

- FR-CARA only: 2,064 doses distributed, and **0** individuals trained since the beginning of the grant, September 30, 2026.
- FR-CARA + other naloxone grants: **13,440** doses distributed, **0** individuals trained in-person, and **72** individuals trained virtually since September 29, 2026.
- Since September 30th, 2026: **19** individuals took the post-naloxone training questionnaire
  - 89.5% feel very confident recognizing the signs of an overdose
  - 84.2% feel very confident understanding of the three steps to administer naloxone
  - 78.9% feel very confident administering naloxone to reverse an overdose
  - 89.5% feel very confident understanding opioids and their effects
- Since September 30th, 2026: **18** reports of individuals using SNHD's naloxone to reverse an overdose.
  - 72% reported 1-2 doses were needed
  - 28% reported 3 or more doses were needed
  - 89.0% reported naloxone was used on men
  - 14/18 survived

PROGRAM UPDATES

- Thank you to the following agencies for returning the naloxone ***BEFORE*** it expired and ensuring that our community's naloxone isn't going to waste:
    - Allure HOA
    - Las Vegas Metropolitan Police Dept

Southern Nevada Health District

PARTNER REMINDERS

- **Please do *not* redistribute the naloxone to other organizations** in bulk. It is intended to equip your staff and to be distributed to individual clients or the public. If other agencies request naloxone from your organization, please refer them to OD@SNHD.ORG and we will supply them directly.
- **Education** - Every person that is distributed naloxone by your staff should receive a brief **training or training materials**.
- **Labels** - If you'd like some stick-on labels that can connect clients to treatment and other resources, please let us know when you place your naloxone order.
- **Next distribution** - **Jan 2027.** Keep your eyes peeled in late Dec or early Jan for your order invites.
- **Q4 Distribution** is closing. If you haven't ordered for Oct – Dec please do so here:

PARTNER REMINDERS

- New order form: Your new order form asks how many cases you require. A case is a shoebox sized box that has 12, 2-dose kits inside for a total of 24 doses.
- We recommend always giving out at least 2 doses so we like to use the guideline that every case you order will be enough to equip 12 people.

Order Form

PARTNER REMINDERS

- Refresher training is recommended every 2 years. Our online, on-demand **Overdose Response Video Training** can be accessed here:

NOW AVAILABLE IN SPANISH!

Southern Nevada Health District

PROGRAM UPDATES

- Please help roll out our Spanish training. The flyer will be put in the chat.

SNHD
Southern Nevada Health District

PROGRAM UPDATES

Our next **Training of Trainers** will be Jan 12th, 2027, at 1:00pm, in person at SNHD at 280 S. Decatur Blvd. Las Vegas

To register, please scan here:

Resources

All known usage of naloxone by your staff or volunteers should be reported using this survey.

We email all our partners this poster so that they can print it and have it in a staff area for convenience. Please ensure that all staff and volunteers know that if they administer naloxone to someone, they should complete this brief survey.

Call out for Connections

The Southern Nevada Health District is seeking connections with local hospital Emergency Department (ED) leadership to encourage and support the implementation of ED-based naloxone distribution.

Providing naloxone directly to patients, friends, and family members before ED discharge is an evidence-based overdose prevention strategy that helps bridge gaps in access. Unlike prescriptions, which may never be filled, direct distribution ensures individuals leave the hospital with naloxone in hand.

We would appreciate your help connecting us with local hospital ED leaders so we can discuss opportunities to support and expand their naloxone distribution efforts. Thank you in advance for your assistance and partnership!
