

Ten ways to
Transform

your **Landscape
Business**

DynaSCAPE

*Design & Business Management Software
for Landscape Professionals*

Ten ways that DynaSCAPE will transform your landscape business

Creating designs. Preparing quotes. Managing your business. The better, faster, and more professionally you work, the more successful your landscape business will be. DynaSCAPE's software solutions provides all of the specialized tools you need to be able to:

Draw spectacular, information-rich designs. Express your landscape ideas more accurately and attractively with DS|Design, the professional landscape designer's choice for uncompromising output. The high quality of DS|Design's drawings leaps off the page with their crisp line weights, professional symbols, and an artistic flare that makes it hard to believe that they weren't hand-drawn.

Show your design's true colors. DS|Color gives you the ability to present full color versions of your designs to your customers. This application introduces an entire spectrum of swatches, shadings and opacities that you can add to any symbol, structure or background. Bring out the true colors of your design's foliage, paving surfaces and water elements with DS|Color's eye-catching hues and styles.

Showcase your design ideas in 3D! DS|Sketch3D is an add-on to Trimble SketchUp, the world's most popular and readily available 3D modelling tool. For DynaSCAPE users there will be an export to SketchUp format right from DS|Design for an easy transition from the 2D world into the 3D world. For both DynaSCAPE users and AutoCAD designers, there are tools to make this transition quick and painless. Anyone using SketchUp can create beautiful 3D models by making use of a huge library of landscape-specific 3D components crafted by DynaSCAPE specifically for SketchUp. These components include plants, ponds, pools, rose arbors and more!

Save time and do more. Produce top quality work and save time? With DynaSCAPE, it's not an 'either-or' proposition. Our solutions are specialized landscape tools that bring you all of the time-saving benefits of automation, without

requiring you to accept any losses in either quality or professionalism. You'll simply design, estimate, manage and even direct your crews faster than ever before. Go the extra mile for your customers. DynaSCAPE lets you add real value to the services that you provide to your customers. Enhance your drawings with color photographs from our huge online Plant Encyclopedia. Add detailed plant care instructions for each recommended species. Embellish your plans with artistic coloring from DS|Color. Provide detailed quotes that dovetail perfectly with your designs. DynaSCAPE offers you many ways to exceed your customers' expectations.

Win more jobs. Anyone who has ever unrolled a design on a client's desk or dining room table knows that top-notch designs win jobs. It's that simple. With the benefit of DS|Design's stunning graphics, DS|Color's artistic enhancements and additional photos and information from our Plant Encyclopedia powered by Horticopia, you'll find it easy to make your ideas understood, your efforts appreciated and your pitch irresistible.

 **Manage your entire business.** Quotes lead to contracts, job scheduling, suppliers, employees, delivery, implementation, invoicing, job costing, accounting and more. DS|Manage360 is a complete business management tool that was tailored-made to provide you with 'big picture' information and business analysis tools that let you see how your day-to-day operations are impacting your bottom line. DS|Manage360 helps you gain real insight into the operations of your landscape company, and new control over its growth and success.

Show your professionalism. The way that you create your designs, prepare your quotes and manage your business speaks volumes about your professionalism and expertise. If trying other entry-level programs has left you with the impression that using landscape software means cutting corners or settling for mediocre, we invite you to take a good close look at DynaSCAPE. Once you see its stunning output

and appreciate its many capabilities and advantages, we're confident that you'll recognize the DynaSCAPE Suite as the one time-saver for your profession with standards as high as your own.

Differentiate yourself. How do you make your company stand out from the crowd in today's competitive landscape market? DynaSCAPE solutions give you the edge you need to make your designs, quotes and business practices memorable to your customers. With DynaSCAPE supporting your efforts, you can easily add that "wow" factor to create an irresistible impression.

Grow your business. Whether you're more interested in increasing your workload or your profits, you'll achieve your goals sooner if DynaSCAPE solutions are supporting your business plan. Unlike other general-purpose programs, the DynaSCAPE Suite is custom-tailored to meet the challenges of landscape businesses. Simply put, it's the best choice to help your business run well. And well-run businesses grow.

Do your due diligence to make the right decision

We know that the decision to automate your landscape operations is an important one, and we want to make sure that you have every opportunity to learn about, and see our software solutions for yourself. If you're ready to find out more, we invite you to:
