

A Sample of Student Testimonials from Previous Classes

The IMI Seminar is different from other training classes. We were taught an aggressive style of shooting and self-defense in facing a crisis. Great emphasis was placed on safety, as well as efficiency of movement. My shooting skills improved dramatically by the end of the seminar. This is the best class available to learn how to respond to active shooter situations.

DB

This was one of the best training classes I have ever attended. The subject matter was relevant, hands on, and taught by people who have been there done that on a daily basis.

JH

I've done a lot of training, but this class prepared me better to face an active shooter than any other. The Israeli's teach an aggressive approach to confronting an enemy that comes from the fact that they have to face such threats on a daily basis. Safety, however, is emphasized throughout, far more than anything else I've ever experienced. I recommend this class to anyone who wants to be better prepared to face a hostile shooter.

SG

I felt privileged to take this course from an instructor who has lived it on the front lines and taught it to so many security officers in Israel. Especially helpful were the intense live fire exercises and rapid movements. It was a very good and highly beneficial course.

BW

Israeli's have the best defense system for identifying and neutralizing threats. Training was amazing, with opportunities to practice and improve on weapon handling and physical combat. Above all, safety was #1 during all real & simulated exercises. Teaching methods were exceptional. I would love to see all concerned citizens have this training for a safer America!
