

## LIMITED SUBMISSION

### Cybersecurity Innovation for Cyberinfrastructure (CICI)

#### Deadlines

**Internal deadline: April 18**

**Agency deadline: June 4**

**Limit: 2**

The objective of the Cybersecurity Innovation for Cyberinfrastructure (CICI) program is to develop, deploy and integrate security solutions that benefit the scientific community by ensuring the integrity, resilience and reliability of the end-to-end scientific workflow. CICI seeks projects in three categories: secure scientific cyberinfrastructure, collaborative security response center and research data protection.

If interested, submit an internal application (or “pre-proposal”) to the Office of Research Development [here](#) no later than **April 18**. The required documents for the internal application can be found [here](#). If the Division receives more internal applications than the allowed limits, an ad hoc review and selection process will be held. If an ad hoc review process is not warranted, those researchers that demonstrated interest will be allowed to move forward with submitting a full proposal to the funding agency.

For more information on this opportunity, click [here](#).
