

FACULTY FOCUS

Supporting Student Learning & Career Readiness

We all have a responsibility to help alleviate barriers for our students and help them learn. We know that effective teaching makes a difference, not only in how students learn but also in how they retain information. Sometimes, however, students' difficulty in learning may be out of their control, such as the case for students with disabilities. Our [Disability Resources for Students](#) office provides documentation for necessary learning environment accommodations, as well as ongoing support in the form of advising and coaching to help students overcome academic challenges.

Although students might enjoy learning, they may also have a desire to work! At this point in the semester, some of our students' anxiety may be attributed to the uncertainty of future employment. An emphasis on career readiness is vital to ensuring our Tigers graduate and be prepared to lead in their respective fields. [Career Services](#), located on the 4th floor of Wilder Tower, provides resume review, mock interviews, career and skills assessments and support to all students as they consider potential careers and/or become ready to find the right job to launch their career.
