

ENDORSEMENTS

“I would recommend VirTra training to anybody, any chief, any Police Department - to go through the system, to train every officer.”

Chief Diamond, West Jordan PD

“I can’t encourage officers enough to attend VirTra training. It is absolutely critical. It will prepare you for situations in ways you cannot otherwise be prepared... It will change the way you think. It will change the way you act and it can help save your life and the lives of others.”

Heather White, Attorney Defending Government Entities

“I got a lot from using the simulator even after being in law enforcement for 18 years and being on the SWAT Team for 12 years. And being in some of those situations I still get value out of using the VirTra just by getting more experience with different scenarios.”

Sgt. Jeremy Robertson, West Jordan PD

“The experience, as I learned firsthand, is unlike anything you read about... It’s split second decision thinking and an incredible method to step into an officer’s shoes during a life or death situation.”

Danica Lawrence, Fox 13 News Reporter

“With the support of the Utah Legislature, Governor, and many other public safety partners, my office is committing new resources and our legal expertise to advance law enforcement training in the State of Utah. In the VirTra virtual reality training facility, officers will have the opportunity to practice critical skills, including tactics, crisis communication and de-escalation, managing stress in critical incidents, and decision-making in the most realistic safe training environment that we can provide.”

Sean Reyes, Utah Attorney General

“This system helps officers communicate in a way that they are re-weaving the fabric of trust in their own community. What we are really doing here is overlaying training with stress inoculation. Officers can make high stress mistakes and learn from them as opposed to high stress mistakes in the public where perhaps someone else pays the price.”

Ken Wallentine, Attorney General Special Agent
