

Miami Township Leaf Collection 2017
Tips to help maximize the efficiency of the program

- Mulch or rake leaves often.
- Place leaf piles near the curb or roadway edge, but not in the roadway. Leaves placed in the roadway create a safety hazard for motorists and a potential liability to the responsible individual.
- Do not place leaves directly in front of or directly into storm water inlets. Leaves blocking the inlets will prohibit proper roadway drainage and may clog drainage tiles. Drain tiles on private property (beyond right-of-way) are the responsibility of the property owner for clearing obstructions.
- Avoid parking vehicles on or near leaf piles. Crews report and record all obstacles which hinder the ability to collect leaves. Parking vehicles on dry leaves create a potential fire hazard.
- Properly bag leaves for collection by Waste Management on the scheduled collection day. Township crews will not pick up bagged leaves placed curbside.
- Avoid mixing grass clippings, sticks and other debris in with leaves. Crews will not pick up leaf piles containing these items.
