**Honeywell****1 GAS DETECTION****Greg Lansaw, Honeywell Analytics**

Greg is the Portable Regional Sales Manager for Honeywell Analytics. He has been in the gas detection business for 10 years and has been providing sales, support and training.

Myth busters and frequently asked questions about gas detection.

- Bump testing vs. calibration.
- What is an event? What is data-logging?
- Intelliflash technology and latching alarms.
- Recordkeeping and what is important.

**Sims CRANE & EQUIPMENT****2 CRANE UPDATE****Bob Berry, Sims Crane & Equipment**

Bob has been in the safety industry for over 30 years and is currently the Safety Director for Sims Crane & Equipment. He is an OSHA outreach instructor and a nationally recognized trainer.

Understand the highly deliberated OSHA crane rule update. There are changes coming in November to the crane rules. Let's discuss what we are expecting to happen and what we really need to know to safely operate equipment and keep employees injury free. You might be surprised at what you learn!

**3 HAND SAFETY** **Armand Coppotelli, Deb USA**

Armand is an Industrial Hygienist and Senior Technical Training Manager for Deb. He has more than 35 years experience advising best practices to maintain good skin health.

**4 SILICA** **Mike Kay, Resource Safety Services**

Mike is a Safety Specialist from the Department of the Navy and carries a BS in EH&S Engineering. He provides support and evaluations for hazardous assessments, reviews, programs and more.

Why gloves alone are just not enough.

- What is the true state of skin and hand health at work?
- Recognizing early signs of risks to hand and skin safety.
- Benefits of a comprehensive skin safety program.
- Demonstrations of key products for use in the construction industry.

- To use Table 1 or not to use Table 1.
- The hierarchy of compliance.
- Action level vs permissible exposure limit.
- Keeping it real on the job site.

**5 OBJECTS AT HEIGHT****Mike Freeman, Ergodyne**

Mike has over 10 years experience in safety and has accomplished his QSSP and OSHA-30 certifications. He is the Senior Regional Director of Sales for Ergodyne.

Awareness, risk and defined solutions.

- Dropped objects, housekeeping and equipment transport.
- How to position Objects at Heights in a safety at heights program.
- Gain awareness of industry conditions including injury statistics, regulations and affected applications.
- The Hierarchy of Controls, best practices within it and solutions to mitigate risks.
