

Q1

Quarterly Market Review

First Quarter 2018

Quarterly Market Review

First Quarter 2018

Stocks rallied in January, corrected in February, and slumped in March as volatility and economic policy changes took some of the enthusiasm out of the market. The Trump administration announced tariffs on foreign steel, aluminum, and assorted products from China; China soon said that it would reciprocate with excise taxes of its own. The Federal Reserve adjusted the federal funds rate upward and welcomed a new chair; the White House appointed a new chief economic advisor. An orderly process was outlined for the Brexit. The placid market climate of 2017 vanished, giving way to trading sessions marked by significant ups and downs.

All three major indices sold off significantly as Q2 began. Investors hope that the March jobs report and the start of a new earnings season will restore some optimism to the market. Housing and retail sales aside, fundamental economic indicators have looked good for the most part. The results of this coming earnings season could take investors' minds off recent headwinds, but a continuation of the marked volatility we witnessed in the first quarter would not be a surprise. If earnings can distract Wall Street away from concerns about trade, the slump in tech shares, and the Fed's plans for tightening; then, the tone might be set for a better month and quarter than some investors expect.

This report features world capital market performance and a timeline of events for the past quarter. It begins with a global overview, then features the returns of stock and bond asset classes in the US and international markets. The report also illustrates the impact of globally diversified portfolios and features a quarterly topic.

Ranked Returns (%)

Growth of Wealth: The Relationship between Risk and Return

1. STDEV (standard deviation) is a measure of the variation or dispersion of a set of data points. Standard deviations are often used to quantify the historical return volatility of a security or portfolio. Diversification does not eliminate the risk of market loss. **Past performance is not a guarantee of future results. Indices are not available for direct investment. Index performance does not reflect expenses associated with the management of an actual portfolio.** Asset allocations and the hypothetical index portfolio returns are for illustrative purposes only and do not represent actual performance. Global Stocks represented by MSCI All Country World Index (gross div.) and Treasury Bills represented by US One-Month Treasury Bills. Globally diversified allocations rebalanced monthly, no withdrawals. Data © MSCI 2018, all rights reserved. Treasury bills © Stocks, Bonds, Bills, and Inflation Yearbook™, Ibbotson Associates, Chicago (annually updated work by Roger G. Ibbotson and Rex A. Sinquefeld).

Sailing with the Tides

First Quarter 2018

Embarking on a financial plan is like sailing around the world. The voyage won't always go to plan, and there'll be rough seas. But the odds of reaching your destination increase greatly if you are prepared, flexible, patient, and well-advised.

A mistake many inexperienced sailors make is not having a plan at all. They embark without a clear sense of their destination. And once they do decide, they often find themselves lost at sea in the wrong boat with inadequate provisions.

Likewise, in planning an investment journey, you need to decide on your goal. A first step might be to consider whether the goal is realistic and achievable. For instance, while you may long to retire in the south of France, you may not be prepared to sacrifice your needs today to satisfy that distant desire.

Once you are set on a realistic destination, you need to ensure you have the right portfolio to get you there. Have you planned for multiple contingencies? What degree of "bad weather" can your plan withstand along the way?

Key to a successful voyage is a good navigator. A trusted advisor is like that, regularly taking coordinates and making adjustments, if necessary. If your circumstances change, the advisor may suggest you replot your course.

As with the weather at sea, markets can be unpredictable. A sudden squall can whip up waves of volatility, tides can shift, and strong currents can threaten to blow you off course. Like a seasoned sailor, an experienced advisor will work with the conditions.

Once the storm passes, you can pick up speed again. Just as a sturdy vessel will help you withstand most conditions at sea, a well-diversified

portfolio can act as a bulwark against the sometimes tempestuous conditions in markets.

Circumnavigating the globe is not exciting every day. Patience is required with local customs and paperwork as you pull into different ports. Likewise, a lack of attention to costs and taxes is the enemy of many a long-term financial plan.

Distractions can also send investors, like sailors, off course. In the face of "hot" investment trends, it takes discipline not to veer from your chosen plan. Like the sirens of Greek mythology, media pundits can also be diverting, tempting you to change tack and act on news that is already priced in to markets.

A lack of flexibility is another impediment to a successful investment journey. If it doesn't look as though you'll make your destination in time, you may have to extend your voyage, take a different route to get there, or even moderate your goal.

The important point is that you become comfortable with the idea that uncertainty is inherent to the investment journey, just as it is with any sea voyage. That is why preparation and planning are so critical. While you can't control every outcome, you can be prepared for the range of possibilities and understand that you have clear choices if things don't go according to plan.

If you can't live with the volatility, you can change your plan. If the goal looks unachievable, you can lower your sights. If it doesn't look as if you'll arrive on time, you can extend your journey.

Of course, not everyone's journey is the same. Neither is everyone's destination. We take different routes to different places, and we meet a range of challenges and opportunities along the way.

But for all of us, it's critical that we are prepared for our journeys in the right vessel, keep our destinations in mind, stick with the plans, and have a trusted navigator to chart our courses and keep us on target.
