

The North Dakota Local Technical Assistance Program (NDLTAP) has developed a Road Scholar Program for road and highway practitioners in North Dakota. It recognizes each participant's achievement in subjects and topics essential to efficient and effective local road maintenance and management.

The Road Scholar program increases your knowledge and awareness of how and why the road systems must be properly managed. The ideas, knowledge, and skills you gain through LTAP training help road and highway personnel on the job, strengthen your agency, preserve the roadway infrastructure, and reduce the cost of maintaining the roadways.

### **2016 Road Scholar Level I Recipients**
