Population Health Course

4 Modules | 100% Online
Self-Paced 24 Hour Access | Free

“Nursing faculty, their students, and experienced nurses should integrate current concepts of population health and wellness care in their educational or clinical practice. This Course will transform the approach to healthcare in all practice settings.”

Lisa J. Sundean, RN, PhD
Director, Connecticut Nursing
Collaborative-Action Coalition

A new approach of healthcare is emerging in this country in which multiple entities work together to better address upstream determinants of health such as the availability of employment in a community; the availability of public transportation; affordable health insurance; access to health care providers; affordable and safe housing; the presence or absence of air pollution; crime; full-service grocery stores supplying fresh fruits and vegetables; and more.

The new approach focuses on population health, and calls for action to improve the health outcomes for all Americans regardless of their gender, race/ethnicity, socioeconomic status, disability status, genetics, sexual orientation, or geography.

“Introduction to Population Health” provides an overview of this new approach and its impact on both practice and our healthcare delivery system. This NEW Course developed in partnership with the Connecticut Nursing Collaborative-Action Coalition and the Connecticut League for Nursing, under a grant from the Robert Wood Johnson Foundation, is a four-module, online, continuing education course to serve as a primer for nurses, nursing students and other healthcare providers.

“How Nurses are Using/Being Impacted by this Course”

As a nurse faculty

“I plan to use the modules in my classroom discussions and clinical learning activities.”

“Great resources to incorporate into a flipped classroom scenario and provide students an opportunity for teach-back and reflective learning.”

As a practicing nurse

“I gained new understanding and broader perspective of population health, and have a greater appreciation for social determinants of health.”

“It is so important to know (Population Health). Knowledge of how we can help our patients by knowing more about their lives outside of the hospital. It definitely is going to help me and my practice.”

Features of this course include:

- A definition of population health and its social determinants;
- Exploration of the role of private and government agencies that stimulate and support the evolution of the population health approach;
- Examination of examples of new initiatives for improving population health as well as data to document initiative outcomes; and
- Strategies and ideas for developing a culture of health in this country.

Course Modules:

Module One

Introduction to Population Health

Module Two

Identifying Outcomes
Representing Achievement
of a Healthy Population

Module Three

Population Health and the
Affordable Care Act

Module Four

Evaluating Practice at the
Population Level and Future
Policy Trends

Population Health Course

Get Started!

Register for the Course on the CLN Learning Management Platform:

1. Visit <https://clnonlineeducation.com/login>
2. At top of the page, you'll find a link **First Time User? Register Now**
3. **Create a User** - You will automatically be a "student" user
4. You will be asked to create a profile
5. Click on **"I'm not a Robot"** to continue
6. You will then be asked to login

Starting & Completing the Course:

1. Each time you wish to utilize the system, you must login at <https://clnonlineeducation.com/login>
2. Enter user name and password
3. Click on **"I'm not a Robot"** to continue
4. On the Landing Page, click on **"Population Health"** link
5. View all the Modules and their statuses
6. Start or continue on a module at any time. You must complete each module before continuing onto the next
7. Once each module is completed, there will be a self-evaluation. Complete this and mark as completed
8. At the end of each module, there is a certificate that you are able to print to show you completed the module
9. Upon completing all the modules, please respond to the exit evaluation to complete the course
