

St. Petersburg Preservation 2017 Preservation Award Nomination Form

Deadline: Monday, December 16, 2016

Are you proud of the restoration work you've done on your home, office, or other historic building? Do you have a neighbor who you think should be recognized for the painstaking work they've put into their historic property? Submit a nomination for a Preservation Award from St. Petersburg Preservation!

St. Petersburg Preservation works to preserve our community's history and wants to recognize the exemplary restoration, preservation, and reuse taking place in our city. We encourage you to use the simple award nomination application form to bring recognition to those building owners who have taken the extra step to ensure that our city retains its special character and heritage!

Don't know which category the property qualifies for? Submit anyway! Our judges will put it in the right place.

Award Categories and Criteria:

- **Restoration (Residential and Commercial)**

Awards in this category recognize exemplary restoration of historic buildings that allow for contemporary use. A restoration project accurately returns a building to an earlier condition and/or appearance based on historical or physical evidence. Restoration focuses on the retention of materials from the most significant time in a property's history, while permitting the removal of materials from other periods.

- **Rehabilitation (Residential and Commercial)**

Awards in this category recognize exemplary rehabilitation of historic buildings. A rehabilitation project preserves significant features of a building that convey its historic value, including historic changes, while making possible an efficient contemporary use for the building. Rehabilitation emphasizes the retention and repair of historic materials, but more latitude is provided for replacement because it is assumed the property is more deteriorated prior to work.

- **Compatible Use**

Awards in this category recognize a contemporarily designed or new building that exemplifies the building's compatibility with that of an adjacent or nearby historic structure, including consideration of the scale and style of the new building, the materials used in its construction and the overall appearance of the new structure in relation to the historic building. The new building need not mimic the detail of the historic building in order to be eligible for this award.

- **Adaptive Reuse**

Awards in this category recognize exemplary adaptive reuse of historic buildings. Adaptive reuse preserves some of the significant features of the historic building although not to the extent to consider the building as having been rehabilitated and allows for a contemporary use of the historic building.

- **Stewardship (Residential and Commercial)**

Awards in this category are presented to long term owners of property who are ensuring the preservation of historic structures or other features of a property through care and maintenance, stabilization or their protection of the historic structure or feature.

- **Preservationist of the Year**

This award may be given to a St. Petersburg resident or local group who has demonstrated exemplary and sustained activities in promoting the preservation of historic structures in St. Petersburg or in promoting awareness in the field of historic preservation. While the focus of the award is on local action the work of the individual or group on a state or national level may also be considered.
